0 of 0 review helpful Gives new meaning to stick a fork in me I m done By Jackie the Greyhound This is a pretty darn funny collection of a series of xrays showing interesting items in locations they were never meant to be Buzz Lightyear seriously I think most people have heard a good story or two but this is a great collection of interesting films I would have found it a little more interesting ho A very funny collection of 100 X ray images showing foreign objects ingested or inserted into human bodies accidentally or on purpose The human imagination truly knows no limits Without it there would be no great art no advances in science and technology and no extreme sports Without it we d also be deprived of the many insights into human nature that we get out of witnessing other people do shockingly imprudent things and then try to rationalize them S About the Author Rich Dreben M D is a board certified psychiatrist who has treated patients in multiple outpatient settings the psychiatric emergency room and jail psychiatry clinics Dr Dreben currently practices psychiatry in California Murdoc Knight
