By Mara Grunbaum : WTF, Evolution?!: A Theory of Unintelligible Design WTF, Evolution?!: A Theory of Unintelligible Design:

45 of 48 review helpful Fun funny educational and enlightening By Gavin Scott The book presents around 101 unusual real world creatures that are the product of billions of years of evolution The most bizarre looking and behaving animals and a few plants that the author could find I was impressed because nearly half the species in the book were ones I'd never heard of before so it was pretty exciting to see all these We all have our off days Why should Evolution be any different Maybe Evolution got carried away with an idea that was just a little too crazy like having the Regal Horned Lizard defend itself by shooting three foot streams of blood from its eyes Or maybe Evolution ran out of steam Memo to Evolution The Irrawaddy Dolphin looks like a prototype that should have been left on the drawing board Or maybe Evolution was feeling cheeky a fish with hands This book cracks me up Grunbaum lends the pitch perfect voice to nature's absurdities Jennifer Holland New York Times bestselling author of Unlikely Friendships
